## Fund Description

PowerShares fixed-income portfolios seek to provide income through intelligent indexes that derive their investment decisions from methodologies that incorporate technically advanced and robust institutional investment research.

The PowerShares Build America Bond Portfolio is based on The BofA Merrill Lynch Build America Bond Index. The Fund will normally invest at least 80% of its total assets in the securities that comprise the Index. The Index is designed to track the performance of U.S. dollar-denominated Build America Bonds publicly issued by U.S. states and territories, and their political subdivisions, in the U.S. market.

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply.

## Fund Inception: Nov. 17, 2009

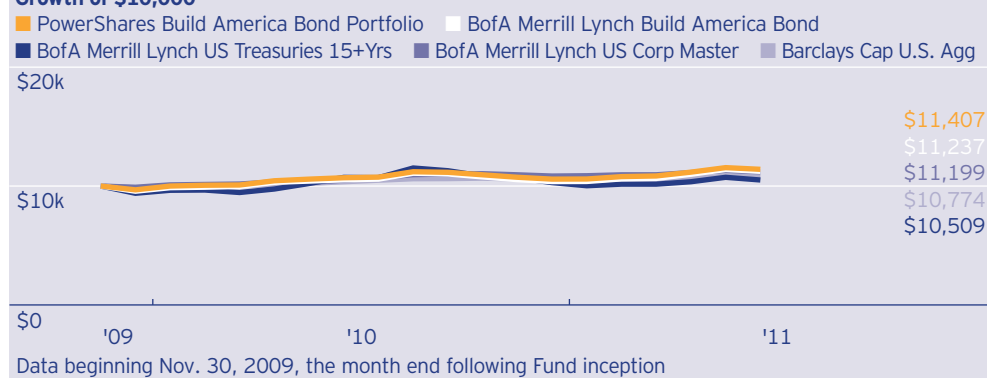

<sup>1</sup> Index returns do not represent Fund returns. An investor cannot invest directly in an index.

<sup>2</sup> Returns for the benchmark indexes are based on the closest month end to the Fund's inception date.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance

Performance data quoted represents past performance. The fund's expense ratio of 0.36% is expressed as a unitary fee; however, the Adviser has voluntarily waived 0.07% of its fee, thereby reducing the expense ratio to 0.29%. The fee waiver may be modified or terminated by the Adviser after April 20, 2012. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. The Shares' performance reflects fee waivers, absent which performance would have been lower. See [invescopowershares.com](http://invescopowershares.com) to find the most recent month-end performance numbers. After Tax Held represents total return after taxes on distributions and assumes Shares have not been sold. After Tax Sold represents total return after taxes on distributions and the sale of Fund Shares. After-tax returns reflect the highest federal income tax rate but exclude state and local taxes. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.

1-Year Index Statistics <sup>1,3</sup>					
	Performance (%)	Volatility (%)	Beta	Sharpe Ratio	Correlation
BofA Merrill Lynch Build America Bond	6.75	7.37	-	0.87	-
BofA Merrill Lynch Treasuries 15+ Yrs	-2.06	13.57	0.51	-0.12	0.88
BofA Merrill Lynch US Corporate Master	6.63	5.12	1.31	1.27	0.83
Barclays Capital U.S. Aggregate	3.90	3.67	1.80	1.00	0.81

shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The BofA Merrill Lynch U.S. Corporate Master Index tracks the performance of U.S. dollar denominated investment grade corporate debt publicly issued in the U.S. domestic market. The BofA Merrill Lynch U.S. Treasuries 15+ Years Index is a subset of The BofA Merrill Lynch U.S. Treasuries Index including all securities with a remaining term to final maturity

greater than or equal to 15 years. The Barclays Capital U.S. Aggregate Index is an unmanaged index considered representative of the U.S. investment-grade, fixed-rate bond market.

**Shares are not FDIC insured, may lose value and have no bank guarantee.**

**Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.**

## Leading the Intelligent ETF Revolution<sup>®</sup>

Underlying Index performance does not represent Fund performance.

<sup>3</sup> The Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Credit ratings are assigned by Nationally Recognized Statistical Rating Organizations based on assessment of the credit worthiness of the underlying bond issuers. The ratings range from AAA (highest) to D (lowest) and are subject to change. Not rated indicates the debtor was not rated, and should not be interpreted as indicating low quality. For more information on rating methodologies, please visit the following NRSRO websites: [standardandpoors.com](http://standardandpoors.com) and select "Understanding Ratings" under Rating Resources and [moody.com](http://moody.com) and select "Rating Methodologies" under Research and Ratings.

Average Yield to Worst is the lowest of all yield to calls or the yield to maturity.

Effective Duration is a measure of a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. This duration measure is appropriate for bonds with embedded options.

Modified Duration is a measure of a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. This duration measure is appropriate for option-free bonds.

<sup>4</sup> Please see the website for complete holdings information. Holdings are subject to change.

Municipal securities are subject to the risk that litigation, legislation or other political events, local business or economic conditions or the bankruptcy of the issuer could have a significant effect on an issuer's ability to make payments of principal and/or interest. Municipal securities can be significantly affected by political changes as well as uncertainties in the municipal market related to taxation, legislative changes or the rights of municipal security holders. Because many securities are issued to finance similar projects, especially those relating to education, health care, transportation and utilities, conditions in those sectors can affect the

overall municipal market. In addition, changes in the financial condition of an individual municipal insurer can affect the overall municipal market.

Because Congress did not extend the Build America Bond program, issuance of Build America Bonds ceased on Dec. 31, 2010. The Build America Bonds outstanding at that time will continue to be eligible for the federal interest rate subsidy, which continues for the life of the Build America Bonds; however, no bonds issued following expiration of the Build America Bond program will be eligible for the federal tax subsidy.

The fund may invest in debt securities, such as notes and bonds, which carry interest rate and credit risk. Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. Credit risk is the risk of loss on an investment due to the deterioration of an issuer's financial health.

The Fund's underlying securities may be subject to call risk, which may result in the Fund having to reinvest the proceeds at lower interest rates, resulting in a decline in the Fund's income.

The Shares are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices.

The Fund's use of a representative sampling approach will result in its holding a smaller number of bonds than are in the underlying Index, and may be subject to greater volatility.

The Fund is considered non-diversified and may be subject to greater risks than a diversified fund.
