Fund Description

The PowerShares Cleantech Portfolio is based on the Cleantech Index[™], which is designed to identify companies within the cleantech industry that possess the greatest capital appreciation potential. The Fund will normally invest at least 90% of its total assets in securities that comprise the Index and American depository receipts based on the stocks in the Index. A company is considered to be part of the cleantech industry if it produces any knowledge-based product or service that improves operation, performance, productivity or efficiency, while reducing costs, inputs, energy consumption, waste or pollution. Securities are selected by the Index utilizing proprietary research.

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. Concentrated industry investments involve greater risks than more diversified investments.

Performance data quoted represents past performance. As stated in the Fund's prospectus, the total expense ratio is 0.71%. However, the Adviser has contractually agreed to waive fees and/or pay certain Fund expenses which resulted in a net expense ratio of 0.67%. These waivers and reimbursement contracts extend through at least Aug. 31, 2011. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. The Shares' performance reflects fee waivers, absent which performance would have been lower. See invescopowershares.com to find the most recent month-end performance numbers. After Tax Held represents total return after taxes on distributions and assumes Shares have not been sold. After Tax Sold represents total return after taxes on distributions and the sale of Fund Shares. After-tax returns reflect the highest federal income tax rate but exclude state and local taxes. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.
