

Most recent month-end performance follows the most recent quarter-end performance.

Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted.

Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. The Shares performance reflects fee waivers, absent which, performance would have been lower.

Most recent month-end performance follows the most recent quarter-end performance.

† Index return data up to Sept. 30, 2009 reflects that of the Listed Private Equity Index. From Sept. 30, 2009 forward, the index return data reflects that of the Global Listed Private Equity Index.

Index returns do not represent Fund returns. An investor cannot invest directly in an index. The index does not charge management fees or brokerage expenses, and no such fees or expenses were deducted from the hypothetical performance shown; nor does the index lend securities, and no revenues from securities lending were added to the performance shown.

The results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund. Market price returns are total return calculations using the daily midpoint on the last trade, including dividend reinvestment.

There are risks involved with investing in ETFs, including possible loss of money. Index-based ETFs are not actively managed. Actively managed ETFs do not necessarily seek to replicate the performance of a specified index. Both index-based and actively managed ETFs are subject to risk similar to stocks, including those related to short selling and margin maintenance. Ordinary brokerage commissions apply.

Shares are subject to risks including: Small and Medium-Sized Company Risk- investing in securities of small and medium-sized companies involves greater risk than is customarily associated with investing in more established companies. The Fund is concentrated in a single industry which involves substantially greater risk of loss and price fluctuations than an investment diversified across multiple industries or sector segments.

Some portfolios invest in the securities of non-U.S. issuers and involve risks beyond those associated with investments in U.S. securities, including, but not limited to: greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity, political instability, negative impact of changes in currency exchange rates or foreign governmental regulation.

The indexes may be concentrated in issues in industries or sectors of the economy. If the portfolio is focused in an industry or sector, it may present more risk than if it were broadly diversified over numerous industries and sectors of the economy. Some portfolios invest in the securities of non-U.S. issuers and involve risks beyond those associated with investments in U.S. securities, including, but not limited to: greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity, political instability, negative impact of changes in currency exchange rates or foreign governmental regulation. Please see the prospectus for complete risk information.

Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.

In calculating the Index performance results, the Index provider applied its proprietary index calculation methodology to determine the performance results that the Index would have achieved had it been in existence for a five year period. The Index provider utilized the performance of ETFs included in the Index to the extent that they were available. However, since certain ETFs included in the Index did not exist for the entire period for which performance results are provided, where the performance information of an ETF was not available, the Index provider used the performance information of the index that the ETF tracks in calculating Index performance. The use of performance information of indexes in lieu of the performance information of ETFs does not reflect the fees and expenses incurred by the ETF. Fees and expenses incurred by the ETF. Had these fees and expenses been included, the performance results of the Index would have been lower.

Shares of the Funds are not in any way sponsored, endorsed, sold or promoted by Standard & Poor's Financial Services LLC, Wachovia Corporation, Wachovia Capital Markets, LLC, Value Line Publishing, Inc., Value Line, Inc., Value Line Securities, Inc., Zacks Investment Research, Mergent, FTSE International Limited, London Stock Exchange Plc, The Financial Times Limited, Research Affiliates LLC, WilderShares, Hydrogen Ventures, Cleantech Indices LLC, Red Rocks Capital Partners, Lux Research, ISBC LLC, Halter, the American Stock Exchange, New Frontier Advisors or their affiliates makes no representation or warranty, express or implied, as to the results to be obtained from the use of the index.
